Professional Summary

Professional full stack engineer prepared to drive innovation and efficiency in web development projects. Extensive experience in designing, building, and optimizing web applications. Known for strong team collaboration and adaptability in dynamic environments. Proficient in Java, JavaScript, React, Node.js, and database management, consistently delivering reliable and scalable solutions.

Skills

- Proficient in JavaScript, Java, Python and C#.
- Skilled in NestJS, NextJS, GraphQL, React, Angular, Spring Boot and Microservices.
- Experience with cloud computing platforms like Azure and AWS
- Database management: Advanced in PostgreSQL and MongoDB.
- Workflow automation using Upstash and N8N.
- Data scraping with Airflow and Hyperbrowser.

Work History

Full Stack Engineer, 01/2025 to 12/2025

Paradigm Seniors Services – Miami, FL

- Developed and maintained responsive web applications using JavaScript, Angular and Next JS.
- Implemented RESTful APIs to enhance data communication between front-end and back-end systems using ASP.NET.
- Optimized database queries in MongoDB and MSSQL to improve application performance and user experience.
- Streamlined workflow processes to enhance operational efficiency across multiple projects using Airflow, Upstash and Hyperbrowser.
- Mentored junior developers on coding standards and project workflows, fostering professional growth within the team.
- Collaborated with cross-functional teams to design scalable software solutions for senior care services.

Full Stack Engineer, 04/2024 to 12/2024

Extendly for Highlevel – San Jose, CA

- Developed RESTful APIs, GraphQL APIs and Microservices using NestJS that facilitated seamless data exchange between clients and servers in a distributed environment.
- Managed deployment processes in AWS using CI/CD tools, streamlining release cycles.
- Collaborated with cross-functional teams to integrate automation solutions into existing processes using N8N.

Full Stack Developer | DevOps, 05/2022 to 04/2024

ChatHQ Inc – Miami, FL

- Developed and maintained scalable web applications using Nestjs, React, GraphQL and MongoDB.
- Collaborated with cross-functional teams to define, design, and ship new features.
- Integrated third-party APIs to extend application capabilities and user experience enhancements.
- Deployed cloud infrastructure and distributed systems on AWS.
- Implemented workflows in N8N allowing the automation and improving the efficiency of several ChatHQ processes.

Education

Bachelor degree: Software Engineering, 11/2020

Technological University of Havana José Antonio Echeverría - La Habana, Cuba
